
Utah 7 Health Education

FREE PREVIEW

Full-Year Teacher Planner, Blank Editable Planner & School-Submission Binder

This preview shows the real structure and a genuine sample of the completed planner. The full product contains 9 units, 36 weekly plans and 180 daily plans, plus blank editable versions of every form.

State	Utah
Grade	7 (Middle)
Subject	Health Education
Course category	Required / State or Local
Standards family	Health Education
Framework	Utah Core Standards
Issuing agency	Utah State Board of Education
Scope	36 instructional weeks · 180 instructional days · 9 units

This is a statewide standards index, not a local course catalog. Course names, grade placement, electives, and graduation sequences vary by district.

What you get

Folder	Contents
01 START HERE	Read-me, contents, printing and digital instructions, standards verification guide, this preview
02 FILLED FULL YEAR	Completed planner in colour and ink-friendly PDF, plus editable DOCX
03 BLANK EDITABLE	Blank planner in colour, ink-friendly and fillable PDF, plus editable DOCX
04 ASSESSMENTS AND DATA	Baseline observation, quarterly rubrics, anecdotal forms, portfolio checklist
05 SCHOOL SUBMISSION	Submission covers, alignment summary, evidence checklist, observation, reflection, signature page
06 LICENSE AND CREDITS	Terms of use, credits and licences, copyright notice

The pages that follow are reproduced **exactly** as they appear in the full completed planner.

Week 9 — Health, Activity and Eating Well

Unit 3: Bodies, Families and Heredity · Month 3 · Quarter 1 · Semester 1 · Instructional Days 41–45

Essential question	What actually keeps a body well, and what is outside anybody's control?
Standards	Health, Activity and Eating Well -> HI.HF.3 Health Foundations And Protective Factors Of Healthy — Practice resiliency skills. a. Practice strategies (for example, positive self-talk, service to others, developing talents and skills) to develop a positive self-image. b. Explain the importance of taking responsibility for one's actions and behaviors and discuss locus of control. c. Develop coping skills by learning from mistakes or perceived failures of self and others.
Learning target	"I can discuss ways that activity, sleep and eating patterns support health."
Local dates	_____ (enter your school dates)

Measurable objectives

- Students will discuss ways to support health through activity, sleep and eating patterns.

Success criteria (student-friendly)

- "I name a way activity supports health."
- "I explain why sleep belongs here."
- "I name a factor that is outside a person's control."

Academic vocabulary

activity, sleep, pattern, energy, factor

Materials and technology

- Notebooks
- Chart paper
- Published health information the teacher selects
- Question box
- Class devices

Differentiation and supports

Support area	This week's plan
Special education / IEP	Reduce group size; pair visual cue cards with all verbal directions; allow gesture or picture response in place of speech; pre-teach the week's target in a 1:1 warm-up.
Section 504	Provide the child's documented accommodations throughout; permit movement breaks and alternative seating at any point in the sequence.
Multilingual learners	Introduce each vocabulary word with an object or image; accept home-language responses; send the vocabulary list home where a translation is available; pair with a peer who shares the home language.
Advanced / extension	Ask the learner to teach the skill to a peer, extend the task, or record a demonstration for the class reference wall.

Support area	This week's plan
Intervention / reteach	Reteach the target in a short small group using the same materials; split the day's check for understanding into two smaller steps.
Enrichment	Extend into an open-ended centre or project connected to the essential question.

Assessment and evidence

Ways discussed across activity, sleep and eating, with uncontrollable factors acknowledged.

Family communication

Ask your child why sleep counts as part of physical health.

Day 41 — How This Week Is Run, and Why

Week 9, Day 1 · Unit 3 · Standards: HI.HF.3

Focus	The ground rules, stated first.
Learning target	"I can discuss ways that activity, sleep and eating patterns support health."
Vocabulary in use	activity, sleep, pattern
Local date	_____

Learning sequence

SAFEGUARDING NOTE: standard HI.HF.3 reads DISCUSS WAYS TO PREVENT OBESITY, and the classroom version of that topic - weighing pupils, calculating BMI, sorting foods into good and bad, setting weight targets - is a known contributor to disordered eating at exactly this age, not a neutral lesson. SO IN THIS WEEK NO PUPIL IS WEIGHED OR MEASURED, NO BMI IS CALCULATED, NO PUPIL'S BODY OR SIZE IS DISCUSSED OR COMPARED, NO FOOD IS CALLED GOOD OR BAD, AND NO BODY SIZE IS TREATED AS A FAILING OR A MORAL MATTER. If a pupil's relationship with food or with their body gives you concern, use your school's own route; do not handle it in the lesson. Connect: Unit 1's dimensions. Teach: the rules above, said aloud to the class. Try: shared restating. Apply: pupils record what this week is and is not about. Reflect: the standard is met by teaching what supports health, not by auditing bodies.

Check for understanding

Student states what this week does not do.

Differentiation in the moment

If the learner...	Then...
needs more support	Model the step again with guided support, then fade to a gesture cue.
is ready for more	Invite the learner to demonstrate for a peer or add a second example.
is dysregulated	Pause instruction, move to co-regulation, and return to the target later.

Closure and reflection

Gather the group. Restate the learning target. Ask one learner to demonstrate. Name one specific thing the group did well, then preview tomorrow.

Teacher reflection (fictional example)

Fictional Example — Customize and Verify Before School Submission.

Most learners met the target. Two needed the visual cue repeated during guided practice; I will pre-teach with them tomorrow. The extension held attention longer than planned, so I shortened closure.

Day 42 — What Activity Does Inside a Body

Week 9, Day 2 · Unit 3 · Standards: HI.HF.3

Focus	Mechanism, not targets.
Learning target	"I can discuss ways that activity, sleep and eating patterns support health."
Vocabulary in use	activity, sleep, pattern
Local date	_____

Learning sequence

Connect: the rules. Teach: what physical activity does - heart and lungs, strength, bone, sleep quality, mood - taught as mechanism, with NO target, no minimum anyone is measured against, and the point that movement someone will actually keep doing beats movement they will not. Try: shared listing from published health information. Apply: pupils record three effects. Reflect: mechanism is transferable; a number is not.

Check for understanding

Student names something activity does in the body.

Differentiation in the moment

If the learner...	Then...
needs more support	Model the step again with guided support, then fade to a gesture cue.
is ready for more	Invite the learner to demonstrate for a peer or add a second example.
is dysregulated	Pause instruction, move to co-regulation, and return to the target later.

Closure and reflection

Gather the group. Restate the learning target. Ask one learner to demonstrate. Name one specific thing the group did well, then preview tomorrow.

Teacher reflection (fictional example)

Fictional Example — Customize and Verify Before School Submission.

Most learners met the target. Two needed the visual cue repeated during guided practice; I will pre-teach with them tomorrow. The extension held attention longer than planned, so I shortened closure.

Day 43 — Sleep Is Part of This

Week 9, Day 3 · Unit 3 · Standards: HI.HF.3

Focus	The under-taught factor.
Learning target	"I can discuss ways that activity, sleep and eating patterns support health."
Vocabulary in use	activity, sleep, pattern
Local date	_____

Learning sequence

Connect: activity. Teach: why sleep sits in a lesson about physical health at all - appetite regulation, concentration, mood, recovery - and that adolescent sleep timing shifts later by biology rather than by choice. Try: shared discussion. Apply: pupils explain why sleep belongs. Reflect: often the single most changeable factor at this age.

Check for understanding

Student explains why sleep belongs to physical health.

Differentiation in the moment

If the learner...	Then...
needs more support	Model the step again with guided support, then fade to a gesture cue.
is ready for more	Invite the learner to demonstrate for a peer or add a second example.
is dysregulated	Pause instruction, move to co-regulation, and return to the target later.

Closure and reflection

Gather the group. Restate the learning target. Ask one learner to demonstrate. Name one specific thing the group did well, then preview tomorrow.

Teacher reflection (fictional example)

Fictional Example — Customize and Verify Before School Submission.

Most learners met the target. Two needed the visual cue repeated during guided practice; I will pre-teach with them tomorrow. The extension held attention longer than planned, so I shortened closure.

Day 44 — Patterns, Not Individual Foods

Week 9, Day 4 · Unit 3 · Standards: HI.HF.3

Focus	The honest framing.
Learning target	"I can discuss ways that activity, sleep and eating patterns support health."
Vocabulary in use	activity, sleep, pattern
Local date	_____

Learning sequence

Connect: sleep. Teach: that health follows overall PATTERNS over time rather than any single food, that no food is good or bad, and that regular meals, variety and enough of them are what published health information actually says. Try: shared discussion of patterns in general terms. Apply: pupils record what a pattern means. Reflect: NO PUPIL DESCRIBES, RECORDS OR REPORTS WHAT THEY EAT, and nothing is collected.

Check for understanding

Student explains why patterns matter more than single foods.

Differentiation in the moment

If the learner...	Then...
needs more support	Model the step again with guided support, then fade to a gesture cue.
is ready for more	Invite the learner to demonstrate for a peer or add a second example.
is dysregulated	Pause instruction, move to co-regulation, and return to the target later.

Closure and reflection

Gather the group. Restate the learning target. Ask one learner to demonstrate. Name one specific thing the group did well, then preview tomorrow.

Teacher reflection (fictional example)

Fictional Example — Customize and Verify Before School Submission.

Most learners met the target. Two needed the visual cue repeated during guided practice; I will pre-teach with them tomorrow. The extension held attention longer than planned, so I shortened closure.

Day 45 — What Nobody Chooses

Week 9, Day 5 · Unit 3 · Standards: HI.HF.3

Focus	Standard HI.HF.3 assessed, honestly.
Learning target	"I can discuss ways that activity, sleep and eating patterns support health."
Vocabulary in use	activity, sleep, pattern
Local date	_____

Learning sequence

Connect: the week. Teach: the factors outside a person's control - genetics, medical conditions, medication, money, what is available where someone lives, disability, sleep disruption - and why a lesson that ignores these teaches children to blame themselves and each other. Try: shared listing. Apply: pupils discuss ways health is supported AND name factors nobody chooses. Reflect: standard HI.HF.3 recorded; the discussion is about health, and NOBODY'S BODY WAS THE SUBJECT.

Check for understanding

Student discusses supportive practices and names an uncontrollable factor.

Differentiation in the moment

If the learner...	Then...
needs more support	Model the step again with guided support, then fade to a gesture cue.
is ready for more	Invite the learner to demonstrate for a peer or add a second example.
is dysregulated	Pause instruction, move to co-regulation, and return to the target later.

Closure and reflection

Gather the group. Restate the learning target. Ask one learner to demonstrate. Name one specific thing the group did well, then preview tomorrow.

Teacher reflection (fictional example)

Fictional Example — Customize and Verify Before School Submission.

Most learners met the target. Two needed the visual cue repeated during guided practice; I will pre-teach with them tomorrow. The extension held attention longer than planned, so I shortened closure.

Important before you buy

- This is a **digital download**. Nothing is shipped.
- The planner is **calendar-neutral**: Month 1–9, Week 1–36, Day 1–180, so it fits any school calendar. You add your own dates.
- Standards were transcribed from the official source.
- Not affiliated with or endorsed by Utah State Board of Education, any district, school, assessment provider or Teachers Pay Teachers.
- No approval, compliance, rating or evaluation outcome is guaranteed.

This is a statewide standards index, not a local course catalog. Course names, grade placement, electives, and graduation sequences vary by district.
